[Announcer]: Privacy. Equality. The right to choose.

Fundamental freedoms Americans have cherished for generations. But John Roberts dismisses

one of our established liberties as the "so-called 'right to privacy,'" and co-wrote a brief

arguing that *Roe v. Wade* should be overturned.

Roberts legal record raises questions on whether he accepts

the right to privacy. There's just too much at stake to let

John Roberts become a decisive vote on the Supreme Court. [PFS]: NARAL Pro-Choice America
