Q1 I know it's a long way off, but thinking ahead to the election for Congress in November 2014, how likely are you to vote? Are you certain to vote, will you probably vote, is there a 50/50 chance that you will vote, or will you probably not vote?

RV
 87 Certain to Vote
 7 Probably
 3 50/50 Chance
 3 Not Planning to Vote
 1 Not Sure

Q2 Thinking about the direction of things here in the country, would you say they are going in the right direction or have they gotten pretty seriously off on the wrong track?

RV
 18 Right Direction
 75 Wrong Track
 8 Not Sure

Q3 Now I am going to read the names of some people and things to you and ask you to rate them on a scale of 1 to 5 using the numbers on your phone, with 1 being the worst and 5 being the best. Think of it the same way restaurants or movies are rated in the newspaper - the more stars something gets the better it is. If you've heard a name but can't rate it, that's fine, and if you haven't heard a name before, that's fine too. [1-5 Scale converted to 0-100 Temperature scale and averaged for those who can rate - 50 implies a neutral balanced rating between negative and positive]

Q4 Now, thinking for a moment about our court system. How much trust and confidence do you have in the courts and judges in your state - a great deal, some, just a little, or none at all?

45	Some
25	Just Little
15	No Confidence
3	Not Sure

Q5+6 Now, I'm going to read you some words that some people might use to describe qualities they look for in supreme court judges on your state's supreme court. After you hear the list, please tell me which one you consider to be the most important. Here's the list: [rotate: Accountable, Ethical, Fair, Impartial, Independent, Open-Minded, Nonpartisan, Trustworthy]. Which one of those descriptions of state supreme court judges do you consider to be most important? [Follow-up second most important trait.]

Q7 Now thinking for a minute about election campaigns for judges. Are you aware that judges in 39 states are allowed to receive campaign contributions and support from individuals, attorneys, businesses, or special interest groups, just like candidates running campaigns for offices like Congress?

RV

Q8 During a campaign, candidates running for judge often raise money for their campaigns by taking contributions from individuals, attorneys, businesses and interest groups that may later have a court case in front of an elected judge. How much influence do you think campaign contributions made to judges have on their decisions - a great deal of influence, some influence, just a little influence or no influence at all?

Sometimes instead of contributing directly to a candidate's campaign, individuals, attorneys, businesses and interest groups that may later have a court case in front of an elected judge will place their own ads to support the judicial candidate they want to win. How much influence do you think this kind of independent spending in support of a judge has on the judge's later decisions - a great deal of influence, some influence, just a little influence or no influence at all?

Q9 And what about when a judicial candidate receives a contribution from an individual, attorney, business or interest group that has a pending case that the elected judge might have to rule on? Do you think that is a very serious problem, somewhat serious problem, not that serious a problem or no problem at all?

Q16 And now think about how often you vote in elections. As you know, the main elections are held every four years for President, but there are also elections for things like Governor, Congress, Mayor and School Board. And in addition to the November elections, the political parties hold primary elections that decide who their nominees will be in the summer. Over the past few years, how often have you voted? Have you voted sometimes when there is a Presidential race, in most Presidential elections or years when your state's governor is running, also in one or two primaries, or almost always even in primaries and special elections?
