Dear ,

We wanted to thank you for taking time out of your busy day to attend our webinar. As you were able to see during our demonstration, Tangles provides you with the tools to not only increase the efficiency of your web intelligence investigations, but to also provide you with actionable data that is otherwise difficult to discover. Below are the key components to Tangles which you can share with others within your agency to reinforce how helpful our solution is:

- **Ability to search the open, deep, and dark web using any kind of entity such as email address, phone number, physical address, keywords, and profile user name**

- **Analyze social media and application profiles to gain insight within minutes, which would normally take hours if not days to do**
- **Monitor in real-time a Geo Location, keywords, profiles or combination of those to asses potential threats**
- **Analyze in real-time a specific profile and/or the dark web to establish behaviors and act on suspicious activity**
- **Collect, store, and analyze your digital evidence while being fully integrated within the investigation platform**

Please reach out to me to schedule an in-depth demo catering to your specific agency, as well as to discuss our special pricing program through the end of the year since you attended our webinar.

Thank you again and we look forward to speaking with you soon.

Best regards,

Evan Hiatt | Sales Director, North America
