

giving authorities and event managers valuable and critical time to react. Media Sonar's Footprint and OSINT Toolkit, combined, can help resolve real-world information about potential threat actors upon the detection of a threat.

### **Enhancing information and intelligence sharing and cooperation with federal agencies;**

Media Sonar allows for easy collaboration and information sharing amongst teams, agencies, and chain of command. Teammates of the Media Sonar platform can share cases and data, allowing for the expedient and efficient investigation of potential threats. Once data has been collected and conclusions are drawn - cases can be exported in either PDF (for ease of briefing other parties and information-sharing) or CSV (for ingestion into other systems) formats.

### **Addressing emerging threats (e.g. transnational criminal organizations, weapons of mass destruction [WMD], unmanned aerial systems [UAS], etc.)"**

The Media Sonar platform uses a mixture of machine learning, artificial intelligence, and querying logic in order to detect and investigate a wide range of topics; from executive protection, to public safety, to detecting indicators of emerging global threats. Using a combination of features like keyword groups, automated detection rules, and alerts - security professionals can be alerted not only of current web data being discovered - but can be confident they will be alerted the moment emerging data is detected. Furthermore, the Media Sonar provides the ability to query in and translate many major languages, which extends the radius of investigation beyond the Stateside boundaries. These technologies allow authorities to gain crucial time to discovery, and then investigate indicators closer to their source.

Hi [REDACTED]

No worries at all. :)

Please find attached the below documents:

1. A summary of all the changes that have taken place since we last spoke with you in 2019.
2. Renewal order form for 2022 (5 users)
3. Renewal order form for 2022 (10 users)

I am not sure either on which proposal was submitted for 2021 budget approval (5 or 10 users). I was hoping you would be able to help me with this information.

The marketing team is working on the language for you around the 4 priorities you shared. I can send that over to you latest by tomorrow.

In the meantime, please let me know if you have any questions or concerns. Happy to jump on a call as well if you prefer.
