Categories: responsive

Mark,

Sorry for the delay - and thanks for filling in the blanks. I am in Austin on Friday but can do 1pm CST or 10am PST if that works.

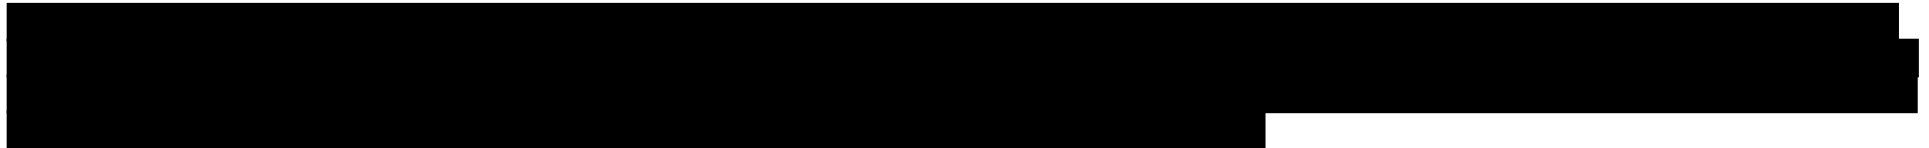

Questions summarized:

[Is Skopenow CJIS compliant?](#) Yes, we have controls for CJIS compliance.

[Is any part of Skopenow based outside of the U.S.?](#) We process all data within the US and US only. Your searches, and your employees data will only be accessible by the CEO (Robert Douglas) in the US.

[What are the 2-3 largest law enforcement agencies you currently contract this service to?](#) We do not have a huge footprint in the law enforcement world, however, we work with Broward County, Martin County, Morristown PD, US Secret Service and USPIS.

[What does Skopenow do to protect user profiles created in Skopenow.](#) There really isn't any user "profile" except for an email address and name. Search history is also encrypted at rest.

Looking forward to chatting - I am also set to be in LAPD at the end of June but I am happy to accommodate your schedule as well.

-Rob
