

## **SOLE SOURCE PROVIDER LETTER**

The proprietary ABTShield product and service was developed to support public institutions like the U.S. Embassy Warsaw, NATO, and the EU in identifying and combating disinformation activities from foreign actor malign influence campaigns. ABTShield is uniquely positioned to support both USG and local law enforcement agencies based on the development of our proprietary tool. ABTShield is unaware of any other comparable commercially available tool to identify foreign actor malign influence attempting to undermine trust in public institutions. Our proven track record and technological capabilities are uniquely positioned to support LAPD's efforts in combating disinformation which undermines public trust in the LAPD and incites activity threatening public safety in Los Angeles.
