Briefing for Department of Commerce

Tori Velkoff, 8/17/2020

1

Briefing Overview

- Review of the 2020 Census Unedited File
- Apportionment
- Undocumented Immigrant Population Estimates
- Federal Prisons and Detention Centers

2020 Census Unedited File (CUF) Review

The CUF is the basis for the total resident population count and apportionment. Analysts from the Demographic and Decennial Directorates will have 13 days to review this file for all 50 states, D.C. and Puerto Rico to ensure the reasonableness of the total population counts prior to apportionment. Review of the CUF will include:

- Ensuring the basic validity of the CUF, including confirming that all variables have values and all values are valid. This step serves to ensure the data itself has not been corrupted during file creation and transfer, as well as helps identify basic programming errors.
- Comparing the CUF to the previous response data files to ensure no major unexpected changes occurred, which could indicate an error in processing.
- Reviewing the total population counts, item nonresponse rates, and the preliminary distribution
 of characteristics for reasonableness. This component of the CUF review is critical and the most
 time consuming. The goal is to ensure that the population totals and demographics of the
 population align with expectations and correspond with benchmarks, such as Population
 Estimates, the 2010 Census, and the American Community Survey. This step also provides the
 opportunity for the Census Bureau to assess the quality of the data and review nonresponse
 rates.

2020 CUF Review Cont.

During the 13-day CUF review period, experts from the Demographic and Decennial Directorates will receive and review the statelevel files on a flow basis. This is because review of the CUF occurs concurrently with production of the state-level files. A day-by-day view of the Demographic Directorate's review is below:

- Day 1 -13: Receive state-level files on a flow basis, complete basic file checks, convert the data file format from Oracle to SAS, and make the files available to analysts.
- Day 2 -13: Analysts will confirm that all variables have values and all values are valid, compare the CUF to previous response data files, and conduct their reasonableness review.
 - * Daily team meetings will occur to discuss review results and any issues identified.
 - * Any issues identified will be immediately troubleshot as they are found and a determination will be made whether the issue needs escalation to senior leadership to consider a re-run and re-review of the files.
- Day 13: Finalize analysis, discuss review results and any identified issues, and document completion of the review.

During this timeframe, all states will be reviewed. However, analysts will focus their review on the first four to ten states and later states will undergo a more cursory review – with the focus of their review primarily on demographic reasonableness.

2020 CUF Review: Test States

As mentioned on the previous slide, test states are the first state-level files that are delivered and will be prioritized and undergo the most in-depth review during the 13-day CUF review period. We currently plan to have five test states, listed below. The test states were chosen to include one state from each of the four Census regions, include states with racial and ethnic diversity, consider population size, and potential demographic shifts caused by COVID-19.

- Louisiana (South) large Black or African American population, unique geographies, and may show impacts from changes to the energy sector that would allow us to check for impacts of COVID-19.
- New Mexico (West) large Hispanic and American Indian populations, unique geographies, and a smaller population.
- South Dakota (Midwest) large American Indian population and small total population.
- Minnesota (Midwest) geographic diversity and seasonal residences that would allow us to check for impacts of COVID-19.
- New Jersey (Northeast) MCD state and has a high Hispanic population as well as college towns and seasonal residences that would allow us to check for impacts of COVID-19.

Apportionment Calculations

After the CUF is reviewed, apportionment calculations are completed. To do this, the Demographic Directorate:

- Receives and verifies input data files from other divisions
- Sums people in each state
- U.S. Resident Population + Federally Affiliated Overseas Population = Apportionment Population
- Programmers calculate apportionment using Method of Equal Proportions

Apportionment Quality Assurance

For Apportionment, the following quality assurance steps are taken:

- 7 programmers from 3 different divisions, using independentlywritten code across a variety of software and computing platforms
- Multiple tests prior to production to ensure programmers' code functions correctly
- During production calculations, multiple iterative output files from each programmer are electronically verified to confirm they match
- Final tables electronically and clerically verified

2010 Apportionment Transmittal Package

For the 2010 Census, the following were included in the apportionment transmittal package.

- Memorandum from Census Bureau Director to Secretary of Commerce, with three tables attached:
 - Table 1: Apportionment Population and Number of Representatives by State
 - Table 2: Resident Population by State
 - Table 3: Federally Affiliated Overseas Population by State
- Letter from Secretary of Commerce to President, with one unnumbered table attached:
 - Apportionment Population and Number of Representatives by State (same content as Table 1 that was sent to Secretary of Commerce)

2010 Apportionment Transmittal Memorandum to Secretary of Commerce

UNITED STATES DEPARTMENT OF COMMERCE Economics and Statistics Administration U.S. Census Bureau Washington, DC 20233-0001 OFFICE OF THE DIRECTOR DEC 2 1 2010

MEMORANDUM FOR The Secretary Rebecca M. Blank Rebecco M. Blank Under Secretary for Economic Affairs Through: Robert M. Groves From: Director Subject: Census 2010 Apportionment Population Counts

Attached is a table showing the apportionment population for each of the 50 States on April 1, 2010, as ascertained by the Twenty-Third Decennial Census of the United States. According to the provisions of Title 13, United States Code, Section 141(b), you are to report these data to the President of the United States on or before December 31, 2010.

Table 1 of the attached package shows the apportionment population for each State, as well as the number of Representatives to which each State is entitled, based on the apportionment population, and the change, if any, since the 2000 Census in the number of Representatives for each State. The U.S. Census Bureau prepared these calculations using the existing size of the U.S. House of Representatives (435 members) and the Method of Equal Proportions, as provided for in Title 2, United States Code, Sections 2a and 2b. The resident population and the overseas population for the 50 States are the two components of the apportionment population. The population of the District of Columbia is not included in the apportionment population.

Also, I am transmitting for your information two additional tables. Table 2 shows the Census 2010 resident population for the 50 States, the District of Columbia, and Puerto Rico. Table 3 shows the overseas population for the 50 States and the District of Columbia. The overseas population is defined as U.S. military and federal civilian employees overseas (and their dependents living with them) allocated to their home state as reported from administrative records by the employing federal agencies.

2010 Apportionment Transmittal Letter to President

UNITED STATES DEPARTMENT OF COMMERCE The Secretary of Commerce Washington, D.C. 20230 DFC 2 1 2010

The President The White House Washington, DC 20500

Dear Mr. President:

In accordance with the provisions of Title 13, United States Code, Section 141(b), I am transmitting the statement showing the apportionment population for each of the 50 States on April 1, 2010, as ascertained by the Twenty-Third Decennial Census of the United States. The 2010 Decennial Census determined that the total apportionment population of the United States is 309,183,463, an increase of 9.9 percent over the 2000 Census apportionment population.

The enclosed table shows the apportionment population for each State, as well as the number of Representatives to which each State is entitled, based on the apportionment population and the change, if any, since the 2000 Census in the number of Representatives for each State. The United States Census Bureau prepared these calculations using the existing size of the U.S. House of Representatives (435 members) and the Method of Equal Proportions, as directed by Congress and provided for in Title 2, United States Code, Section 2a, enacted in 1929 and thereafter amended, as well as Title 2, United States Code, Section 2b, enacted in 1941. The methodology for calculating the apportionment totals has not changed since the 1940 Census.

The population of the District of Columbia is not included in the apportionment population. Under Section 2a, you are to send this information to the 112th Congress during the first week of its first regular session.

Enclosure

U.S. Department of Commerce U.S. Census Bureau

| Wyoming | 568,300 | 1 | Ō |
| TOTAL APPORTIONMENT POPULATION ¹ | 309,183,463 | 435 | |

¹ Includes the resident population for the 50 states, as ascertained by the Twenty-Third Decennial Census under Title 13, United States Code, and counts of overseas U.S. military and federal civilian employees (and their dependents living with them) allocated to their home state, as reported by the employing federal agencies. The apportionment population excludes the population of the District of Columbia.

Reviewing the Undocumented Immigrant Population Estimates

The Demographic Directorate will be involved in quality-checking (double programming) the business rules that identify and tabulate undocumented immigrants.

After disclosure avoidance is applied, the Demographic Directorate will then review the tabulated file of undocumented immigrant counts.

- 1. Verify file (e.g., does every state have an estimate?)
- 2. Data reasonableness review. Typical process: (1) Compare current-year estimates to prior-year estimates (2) Compare to other, similar estimates (benchmarks).
- No recent Census Bureau estimates of undocumented immigrant population.
- Compare to estimates of undocumented population from Pew Research Center (Pew 2018), Center for Migration Statistics (Warren 2018), and Office of Immigration Statistics (OIS 2018). Specifically, compare levels and rough rank-ordering of states.
- Then, put undocumented immigrant estimates data into a table shell and review.

2020 Census Data Collection Federal Prisons and Detention Centers

- Decennial Census Management Division has a MOU with federal agencies to collect data on federally incarcerated inmates in their custody in dedicated and non-dedicated facilities.
 - Bureau of Prisons (BOP)
 - U.S. Immigration and Customs Enforcement (ICE)
 - U.S. Marshals Service (USMS)
 - Bureau of Indian Affairs (BIA)
- Data from BOP, ICE, and USMS were submitted through the Electronic Response Data Transfer (eResponse) enumeration method.

Group Quarter Types Federal Prisons and Detention Centers

| CORRECTIONAL FACILITIES FOR ADULTS | |
|---|---|
| Type Code: 101 Federal Detention Centers | Stand alone, generally multi-level, federally operated correctional facilities that provide "short-term" confinement or custody of adults pending adjudication or sentencing. These facilities may hold pretrial detainees, holdovers, sentenced offenders, and Immigration and Customs Enforcement (ICE) inmates, formerly called Immigration and Naturalization Service (INS) inmates. These facilities include: Metropolitan Correctional Centers (MCCs), Metropolitan Detention Centers (MDCs), Federal Detention Centers (FDCs), Bureau of Indian Affairs Detention Centers, ICE Service Processing Centers, and ICE contract detention facilities. |
| Type Code: 102 Federal Prisons | Adult correctional facilities where people convicted of crimes serve their sentences. Common names include: prison, penitentiary, correctional institution, federal correctional facility, and conservation camp. The prisons are operated by or for the Bureau of Prisons of the Department of Justice. Residents who are forensic patients or criminally insane are classified on the basis of where they resided at the time of enumeration. Patients in hospitals (units, wings, or floors) operated by or for federal correctional authorities are counted in the prison population. Other forensic patients will be enumerated in psychiatric hospital units and floors for long-term non-acute patients. This category may include privately operated correctional facilities. |
| JUVENILE FACILITIES | |
| Type Code: 203 Correctional Facilities Intended for Juveniles | Includes specialized facilities that provide strict confinement for its residents and detain juveniles awaiting adjudication, commitment or placement, and/or those being held for diagnosis or classification. Also included are correctional facilities where residents are permitted contact with the community, for purposes such as attending school or holding a job. |

2020 Census Data Processing Federal Prisons and Detention Centers

- All ICE, USMS, and BIA dedicated and non-dedicated facilities are set to GQ type code 101 Federal Detention Centers
- BOP Federal Detention Centers (FDC), Federal Transfer Centers (FTC), Metropolitan Correctional Centers (MCC), and Metropolitan Detention Centers (MDC) are set to GQ type code 101
- All other BOP facilities set to GQ type code 102
- Any facility where the median age of inmates is under 15 years is reassigned to GQ type code 203 during the creation of the Census Edited File.

2020 Census Data Other Group Quarters

- Undocumented persons could be enumerated in other GQ types, such as
 - 103 State Prisons
 - 104 Local Jails and Other Municipal Confinement Centers
 - 105 Correctional Residential Facilities
 - 402 Hospitals with Patients Who Have No Usual Home Elsewhere
 - 501 College/University Student Housing
 - 701 Emergency and Transitional Shelters
 - 702 Soup Kitchens
 - 704 Regularly Scheduled Mobile Food Vans
 - 706 Targeted Non-Sheltered Outdoor Locations
 - 901 Workers' Group Living Quarters and Job Corps Centers
 - 902 Religious Group Quarters
- Or, in housing units

2020 Census Unedited File (CUF) Review

The CUF is the basis for the total resident population count and apportionment. Analysts from the Demographic and Decennial Directorates will have 13 days to review this file for all 50 states, D.C. and Puerto Rico to ensure the reasonableness of the total population counts prior to apportionment. Review of the CUF will include:

- Ensuring the basic validity of the CUF, including confirming that all variables have values and all values are valid. This step serves to ensure the data itself has not been corrupted during file creation and transfer, as well as helps identify basic programming errors.
- Comparing the CUF to the previous response data files to ensure no major unexpected changes occurred, which could indicate an error in processing.
- Reviewing the total population counts, item nonresponse rates, and the preliminary distribution
 of characteristics for reasonableness. This component of the CUF review is critical and the most
 time consuming. The goal is to ensure that the population totals and demographics of the
 population align with expectations and correspond with benchmarks, such as Population
 Estimates, the 2010 Census, and the American Community Survey. This step also provides the
 opportunity for the Census Bureau to assess the quality of the data and review nonresponse
 rates.

2020 CUF Review Cont.

During the 13-day CUF review period, experts from the Demographic and Decennial Directorates will receive and review the statelevel files on a flow basis. This is because review of the CUF occurs concurrently with production of the state-level files. A day-by-day view of the Demographic Directorate's review is below:

- Day 1 -13: Receive state-level files on a flow basis, complete basic file checks, convert the data file format from Oracle to SAS, and make the files available to analysts.
- Day 2 -13: Analysts will confirm that all variables have values and all values are valid, compare the CUF to previous response data files, and conduct their reasonableness review.
 - * Daily team meetings will occur to discuss review results and any issues identified.
 - * Any issues identified will be immediately troubleshot as they are found and a determination will be made whether the issue needs escalation to senior leadership to consider a re-run and re-review of the files.
- Day 13: Finalize analysis, discuss review results and any identified issues, and document completion of the review.

During this timeframe, all states will be reviewed. However, analysts will focus their review on the first four to ten states and later states will undergo a more cursory review – with the focus of their review primarily on demographic reasonableness.

2020 CUF Review: Test States

As mentioned on the previous slide, test states are the first state-level files that are delivered and will be prioritized and undergo the most in-depth review during the 13-day CUF review period. We currently plan to have five test states, listed below. The test states were chosen to include one state from each of the four Census regions, include states with racial and ethnic diversity, consider population size, and potential demographic shifts caused by COVID-19.

- Louisiana (South) large Black or African American population, unique geographies, and may show impacts from changes to the energy sector that would allow us to check for impacts of COVID-19.
- New Mexico (West) large Hispanic and American Indian populations, unique geographies, and a smaller population.
- South Dakota (Midwest) large American Indian population and small total population.
- Minnesota (Midwest) geographic diversity and seasonal residences that would allow us to check for impacts of COVID-19.
- New Jersey (Northeast) MCD state and has a high Hispanic population as well as college towns and seasonal residences that would allow us to check for impacts of COVID-19.

Apportionment Calculations

After the CUF is reviewed, apportionment calculations are completed. To do this, the Demographic Directorate:

- Receives and verifies input data files from other divisions
- Sums people in each state
- U.S. Resident Population + Federally Affiliated Overseas Population = Apportionment Population
- Programmers calculate apportionment using Method of Equal Proportions

Apportionment Quality Assurance

For Apportionment, the following quality assurance steps are taken:

- 7 programmers from 3 different divisions, using independentlywritten code across a variety of software and computing platforms
- Multiple tests prior to production to ensure programmers' code functions correctly
- During production calculations, multiple iterative output files from each programmer are electronically verified to confirm they match
- Final tables electronically and clerically verified

2010 Apportionment Transmittal Package

For the 2010 Census, the following were included in the apportionment transmittal package.

- Memorandum from Census Bureau Director to Secretary of Commerce, with three tables attached:
 - Table 1: Apportionment Population and Number of Representatives by State
 - Table 2: Resident Population by State
 - Table 3: Federally Affiliated Overseas Population by State
- Letter from Secretary of Commerce to President, with one unnumbered table attached:
 - Apportionment Population and Number of Representatives by State (same content as Table 1 that was sent to Secretary of Commerce)

2010 Apportionment Transmittal Memorandum to Secretary of Commerce

UNITED STATES DEPARTMENT OF COMMERCE Economics and Statistics Administration U.S. Census Bureau Washington, DC 20233-0001 OFFICE OF THE DIRECTOR DEC 2 1 2010

MEMORANDUM FOR The Secretary Rebecca M. Blank Rebecco M. Blank Under Secretary for Economic Affairs Through: Robert M. Groves From: Director Subject: Census 2010 Apportionment Population Counts

Attached is a table showing the apportionment population for each of the 50 States on April 1, 2010, as ascertained by the Twenty-Third Decennial Census of the United States. According to the provisions of Title 13, United States Code, Section 141(b), you are to report these data to the President of the United States on or before December 31, 2010.

Table 1 of the attached package shows the apportionment population for each State, as well as the number of Representatives to which each State is entitled, based on the apportionment population, and the change, if any, since the 2000 Census in the number of Representatives for each State. The U.S. Census Bureau prepared these calculations using the existing size of the U.S. House of Representatives (435 members) and the Method of Equal Proportions, as provided for in Title 2, United States Code, Sections 2a and 2b. The resident population and the overseas population for the 50 States are the two components of the apportionment population. The population of the District of Columbia is not included in the apportionment population.

Also, I am transmitting for your information two additional tables. Table 2 shows the Census 2010 resident population for the 50 States, the District of Columbia, and Puerto Rico. Table 3 shows the overseas population for the 50 States and the District of Columbia. The overseas population is defined as U.S. military and federal civilian employees overseas (and their dependents living with them) allocated to their home state as reported from administrative records by the employing federal agencies.

2010 Apportionment Transmittal Letter to President

UNITED STATES DEPARTMENT OF COMMERCE The Secretary of Commerce Washington, D.C. 20230 DFC 2 1 2010

The President The White House Washington, DC 20500

Dear Mr. President:

In accordance with the provisions of Title 13, United States Code, Section 141(b), I am transmitting the statement showing the apportionment population for each of the 50 States on April 1, 2010, as ascertained by the Twenty-Third Decennial Census of the United States. The 2010 Decennial Census determined that the total apportionment population of the United States is 309,183,463, an increase of 9.9 percent over the 2000 Census apportionment population.

The enclosed table shows the apportionment population for each State, as well as the number of Representatives to which each State is entitled, based on the apportionment population and the change, if any, since the 2000 Census in the number of Representatives for each State. The United States Census Bureau prepared these calculations using the existing size of the U.S. House of Representatives (435 members) and the Method of Equal Proportions, as directed by Congress and provided for in Title 2, United States Code, Section 2a, enacted in 1929 and thereafter amended, as well as Title 2, United States Code, Section 2b, enacted in 1941. The methodology for calculating the apportionment totals has not changed since the 1940 Census.

The population of the District of Columbia is not included in the apportionment population. Under Section 2a, you are to send this information to the 112th Congress during the first week of its first regular session.

Enclosure

U.S. Department of Commerce U.S. Census Bureau

| TOTAL APPORTIONMENT POPULATION ¹ 309,183,463 435 | | 309,183,463 | 435 | |

¹ Includes the resident population for the 50 states, as ascertained by the Twenty-Third Decennial Census under Title 13, United States Code, and counts of overseas U.S. military and federal civilian employees (and their dependents living with them) allocated to their home state, as reported by the employing federal agencies. The apportionment population excludes the population of the District of Columbia.

Apportionment

Demographic Directorate/Population Division 8/17/2020

1

2020 Census Unedited File (CUF) Review

The CUF is the basis for the total resident population count and apportionment. Analysts from the Demographic and Decennial Directorates will have 13 days to review this file for all 50 states, D.C. and Puerto Rico to ensure the reasonableness of the total population counts prior to apportionment. Review of the CUF will include:

- Ensuring the basic validity of the CUF, including confirming that all variables have values and all values are valid. This step serves to ensure the data itself has not been corrupted during file creation and transfer, as well as helps identify basic programming errors.
- Comparing the CUF to the previous response data files to ensure no major unexpected changes occurred, which could indicate an error in processing.
- Reviewing the total population counts, item nonresponse rates, and the preliminary distribution
 of characteristics for reasonableness. This component of the CUF review is critical and the most
 time consuming. The goal is to ensure that the population totals and demographics of the
 population align with expectations and correspond with benchmarks, such as Population
 Estimates, the 2010 Census, and the American Community Survey. This step also provides the
 opportunity for the Census Bureau to assess the quality of the data and review nonresponse
 rates.

2020 CUF Review Cont.

During the 13-day CUF review period, experts from the Demographic and Decennial Directorates will receive and review the statelevel files on a flow basis. This is because review of the CUF occurs concurrently with production of the state-level files. A day-by-day view of the Demographic Directorate's review is below:

- Day 1 -13: Receive state-level files on a flow basis, complete basic file checks, convert the data file format from Oracle to SAS, and make the files available to analysts.
- Day 2 -13: Analysts will confirm that all variables have values and all values are valid, compare the CUF to previous response data files, and conduct their reasonableness review.
 - * Daily team meetings will occur to discuss review results and any issues identified.
 - * Any issues identified will be immediately troubleshot as they are found and a determination will be made whether the issue needs escalation to senior leadership to consider a re-run and re-review of the files.
- Day 13: Finalize analysis, discuss review results and any identified issues, and document completion of the review.

During this timeframe, all states will be reviewed. However, analysts will focus their review on the first four to ten states and later states will undergo a more cursory review – with the focus of their review primarily on demographic reasonableness.

2020 CUF Review: Test States

As mentioned on the previous slide, test states are the first state-level files that are delivered and will be prioritized and undergo the most in-depth review during the 13-day CUF review period. We currently plan to have five test states, listed below. The test states were chosen to include one state from each of the four Census regions, include states with racial and ethnic diversity, consider population size, and potential demographic shifts caused by COVID-19.

- Louisiana (South) large Black or African American population, unique geographies, and may show impacts from changes to the energy sector that would allow us to check for impacts of COVID-19.
- New Mexico (West) large Hispanic and American Indian populations, unique geographies, and a smaller population.
- South Dakota (Midwest) large American Indian population and small total population.
- Minnesota (Midwest) geographic diversity and seasonal residences that would allow us to check for impacts of COVID-19.
- New Jersey (Northeast) MCD state and has a high Hispanic population as well as college towns and seasonal residences that would allow us to check for impacts of COVID-19.

Apportionment Calculations

After the CUF is reviewed, apportionment calculations are completed. To do this, the Demographic Directorate:

- Receives and verifies input data files from other divisions
- Sums people in each state
- U.S. Resident Population + Federally Affiliated Overseas Population = Apportionment Population
- Programmers calculate apportionment using Method of Equal Proportions

Apportionment Quality Assurance

For Apportionment, the following quality assurance steps are taken:

- 7 programmers from 3 different divisions, using independentlywritten code across a variety of software and computing platforms
- Multiple tests prior to production to ensure programmers' code functions correctly
- During production calculations, multiple iterative output files from each programmer are electronically verified to confirm they match
- Final tables electronically and clerically verified

2010 Apportionment Transmittal Package

For the 2010 Census, the following were included in the apportionment transmittal package.

- Memorandum from Census Bureau Director to Secretary of Commerce, with three tables attached:
 - Table 1: Apportionment Population and Number of Representatives by State
 - Table 2: Resident Population by State
 - Table 3: Federally Affiliated Overseas Population by State
- Letter from Secretary of Commerce to President, with one unnumbered table attached:
 - Apportionment Population and Number of Representatives by State (same content as Table 1 that was sent to Secretary of Commerce)

2010 Apportionment Transmittal Memorandum to Secretary of Commerce

UNITED STATES DEPARTMENT OF COMMERCE Economics and Statistics Administration U.S. Census Bureau Washington, DC 20233-0001 OFFICE OF THE DIRECTOR DEC 2 1 2010

MEMORANDUM FOR The Secretary Rebecca M. Blank Rebecco Maul Under Secretary for Economic Affairs Through: Robert M. Groves From: Director Subject: Census 2010 Apportionment Population Counts

Attached is a table showing the apportionment population for each of the 50 States on April 1, 2010, as ascertained by the Twenty-Third Decennial Census of the United States. According to the provisions of Title 13, United States Code, Section 141(b), you are to report these data to the President of the United States on or before December 31, 2010.

Table 1 of the attached package shows the apportionment population for each State, as well as the number of Representatives to which each State is entitled, based on the apportionment population, and the change, if any, since the 2000 Census in the number of Representatives for each State. The U.S. Census Bureau prepared these calculations using the existing size of the U.S. House of Representatives (435 members) and the Method of Equal Proportions, as provided for in Title 2, United States Code, Sections 2a and 2b. The resident population and the overseas population for the 50 States are the two components of the apportionment population. The population of the District of Columbia is not included in the apportionment population.

Also, I am transmitting for your information two additional tables. Table 2 shows the Census 2010 resident population for the 50 States, the District of Columbia, and Puerto Rico. Table 3 shows the overseas population for the 50 States and the District of Columbia. The overseas population is defined as U.S. military and federal civilian employees overseas (and their dependents living with them) allocated to their home state as reported from administrative records by the employing federal agencies.

2010 Apportionment Transmittal Letter to President

UNITED STATES DEPARTMENT OF COMMERCE The Secretary of Commerce Washington, D.C. 20230 DFC 2 1 2010

The President The White House Washington, DC 20500

Dear Mr. President:

In accordance with the provisions of Title 13, United States Code, Section 141(b), I am transmitting the statement showing the apportionment population for each of the 50 States on April 1, 2010, as ascertained by the Twenty-Third Decennial Census of the United States. The 2010 Decennial Census determined that the total apportionment population of the United States is 309,183,463, an increase of 9.9 percent over the 2000 Census apportionment population.

The enclosed table shows the apportionment population for each State, as well as the number of Representatives to which each State is entitled, based on the apportionment population and the change, if any, since the 2000 Census in the number of Representatives for each State. The United States Census Bureau prepared these calculations using the existing size of the U.S. House of Representatives (435 members) and the Method of Equal Proportions, as directed by Congress and provided for in Title 2, United States Code, Section 2a, enacted in 1929 and thereafter amended, as well as Title 2, United States Code, Section 2b, enacted in 1941. The methodology for calculating the apportionment totals has not changed since the 1940 Census.

The population of the District of Columbia is not included in the apportionment population. Under Section 2a, you are to send this information to the 112th Congress during the first week of its first regular session.

Enclosure
