Data current as of:

August 27, 2020

Completion Date:

March 2020

Notes:

- 2010 Census: 256,000 regional partners and 856 national partnering organizations.
- We have exceeded the 2010 Census for both national and community partners.
- The National Partnership Program (NPP) met its 2020 Census goal the week of April 20 of securing 900 national participating organizations. NPP will continue to grow the number of national partners and engagements.

Significant Accomplishments

- Census Open Innovations Lab (COIL) launched the "Get Out the Count Challenge" Videos Database for partners and stakeholders to access over 400+ videos that have passed compliance from video challenge submissions.
- The Community Partnership & Engagement Program (CPEP) is conducting debriefs with partnership specialists in the Philadelphia, Denver, and Dallas regions to determine what worked well, what were the challenges, and how the program can be improved.
- Statistics In Schools (SIS) published their online back to school guide and staff appeared on two podcast interviews.

2020 Census: Monthly FY 2020 Budget Execution Report

Status: ● On Track

Data current as of: July 31, 2020

Completion Date: September 30, 2020

Notes: The data are updated monthly following the financial close-out of the previous month, typically about five business days into the next month.

FY 2020 Actual Budget Execution for the 2020 Census Program - Commitments and Obligations through 7/31/2020

\$ Amounts in Millions	IT	Non-IT	Total
Total Planned through July	\$1,728	\$5,155	\$6,883
Available contingency and additional appropriations through July	\$248	\$1,432	\$1,680
Planned Programmatic through July	\$1,480	\$3,723	\$5,203
Total Actual Commitments and Obligations through July	\$1,653	\$2,390	\$4,043
Unplanned commitments/obligations through July related to adjusted 2020 Census operations due to COVID-19 (risk-based contingency)	\$260	\$300	\$560
Actual Programmatic Commitments and Obligations through July	\$1,393	\$2,090	\$3,483
Total Plan Variance (\$/%)	\$75 (4.3%)	\$2,765 (53.6%)	\$2,840 (41.3%)
Remaining contingency and additional appropriations planned through July	(\$12)	\$1,132	\$1,120
Delayed Field Operation Spending through July	\$0	\$1,690	\$1,690
Non-Field Operational Programmatic Variance through July	\$87	(\$57)	\$30

High-Level Variance Explanations:

In light of the COVID-19 pandemic, the U.S. Census Bureau adjusted 2020 Census operations in order to protect the health and safety of the American public and Census Bureau employees, implement guidance from Federal, State, and local authorities regarding COVID-19, and ensure a complete and accurate count of all communities. These adjustments resulted in positive variances due to schedule adjustments, offset by additional obligations needed to support operational adjustments through the usage of available contingency funding. The total variance for the resources planned to be available through July is \$2.840 billion, or 41 percent. Below outlines the breakdown of the total variance:

- The positive variance through July against the original plan in 2020 Census IT systems and operations is \$75 million, or 4 percent. The positive variance is the result of relatively routine minor timing adjustments in contract actions and other IT purchases to later months in the fiscal year, partially offset by \$12 million in IT contingency used as the result of adjusted 2020 Census operations due to COVID-19 beyond the IT contingency estimate.
- The positive variance through July against the original plan in 2020 Census non-IT operations is \$2.765 billion, or 54 percent. This variance consists of \$1.690 billion delayed spending in the field operations as a result of schedule adjustments, and \$1.132 billion representing a portion of available contingency and additional appropriations that has not yet needed to be obligated. This variance is partially offset by a -\$57 million non-Field variance, primarily from a prior decision to increase funding above the original plan for the ICC contract to facilitate additional media purchases ahead of Census Day.
- While unused contingency contributes to the overall positive variance, this is a function of a budget decision last October to make all risk-based contingency available for peak operations. Decisions have been made to use risk-based contingency funds to support \$560 million in unplanned obligations or commitments through July as the result of the operational adjustments. The funds used to date include funding field staff salaries during to the suspension of field operations, IT purchases for additional devices and licenses, additional media purchases to encourage self response, extending the communication efforts in the motivation and NRFU planning phases, purchases of personal protection equipment, and additional costs for the Fingerprint and CQA Contracts as the result of the operational timing adjustments.

FY 2020 Actual Budget Execution for the 2020 Census Program - Commitments and Obligations through 7/31/2020

\$ Amounts in Millions	IT	Non-IT	Total
Total Planned through July	\$1,728	\$5,155	\$6,883
Available contingency and additional appropriations through July	\$248	\$1,432	\$1,680
Planned Programmatic through July	\$1,480	\$3,723	\$5,203
Total Actual Commitments and Obligations through July	\$1,653	\$2,390	\$4,043
Unplanned commitments/obligations through July related to adjusted 2020 Census operations due to COVID-19 (risk-based contingency)	\$260	\$300	\$560
Actual Programmatic Commitments and Obligations through July	\$1,393	\$2,090	\$3,483
Total Plan Variance (\$/%)	\$75 (4.3%)	\$2,765 (53.6%)	\$2,840 (41.3%)
Remaining contingency and additional appropriations planned through July	(\$12)	\$1,132	\$1,120
Delayed Field Operation Spending through July	\$0	\$1,690	\$1,690
Non-Field Operational Programmatic Variance through July	\$87	(\$57)	\$30

High-Level Variance Explanations:

In light of the COVID-19 pandemic, the U.S. Census Bureau adjusted 2020 Census operations in order to protect the health and safety of the American public and Census Bureau employees, implement guidance from Federal, State, and local authorities regarding COVID-19, and ensure a complete and accurate count of all communities. These adjustments resulted in positive variances due to schedule adjustments, offset by additional obligations needed to support operational adjustments through the usage of available contingency funding. The total variance for the resources planned to be available through July is \$2.840 billion, or 41 percent. Below outlines the breakdown of the total variance:

- The positive variance through July against the original plan in 2020 Census IT systems and operations is \$75 million, or 4 percent. The positive variance is the result of relatively routine minor timing adjustments in contract actions and other IT purchases to later months in the fiscal year, partially offset by \$12 million in IT contingency used as the result of adjusted 2020 Census operations due to COVID-19 beyond the IT contingency estimate.
- The positive variance through July against the original plan in 2020 Census non-IT operations is \$2.765 billion, or 54 percent. This variance consists of \$1.690 billion delayed spending in the field operations as a result of schedule adjustments, and \$1.132 billion representing a portion of available contingency and additional appropriations that has not yet needed to be obligated. This variance is partially offset by a -\$57 million non-Field variance, primarily from a prior decision to increase funding above the original plan for the ICC contract to facilitate additional media purchases ahead of Census Day.
- While unused contingency contributes to the overall positive variance, this is a function of a budget decision last October to make all risk-based contingency available for peak operations. Decisions have been made to use risk-based contingency funds to support \$560 million in unplanned obligations or commitments through July as the result of the operational adjustments. The funds used to date include funding field staff salaries during to the suspension of field operations, IT purchases for additional devices and licenses, additional media purchases to encourage self response, extending the communication efforts in the motivation and NRFU planning phases, purchases of personal protection equipment, and additional costs for the Fingerprint and CQA Contracts as the result of the operational timing adjustments.
