The vendor supports the licenses well with almost a concierge type service. Its totally hosted. From an IT perspective there is very little to support.

Thanks Barney, we have a high level of interest, some unutilized licenses would be great for a POC. Are their training materials available via the vendor?

Subject: RE: Dataminr

David,

HSEMA gave OCTO an MOU and we purchased 50 Dataminr named user licenses for \$200,000. Of those 50, not all are in use. OCTO holds 5 and HSEMA 45. Potentially those licenses can be used by anyone on DC.gov. I believe HSEMA would want MPD to have some and I've copied Donell and Madeline so they can weigh in. Would be very handy with situations like Minneapolis should that ever happen here. Certainly MPD should be able to get some in the near term.

Subject: Re: Dataminr

Hey Barney,

MPD is interested in Dataminr for situational awareness. Can you help with the following:

- overview/background on how HSEMA is utilizing it
- setting up a demo for MPD
- License structure and cost per license

Thanks,

David Clow
