Introduction

Executive Order 12958 requires that classified national security information ("classified information") be marked to place recipients on alert about its sensitivity. The purpose of this pamphlet is to provide a general guide on these marking requirements. It is intended for use by authorized original and derivative classifiers as well as administrative personnel who may prepare the final product. Since a pamphlet of this size cannot illustrate every conceivable situation, please refer to the implementing directive published in Part 2001 of Title 32, Code of Federal Regulations, and any instructions issued by your particular organization. Consult your security manager if you have any questions.

This pamphlet is unclassified. All the security markings used are for illustration purposes only. Also, it is in the public domain and may be reproduced without permission.

Your comments are welcome.

Steven Garfinkel
Director
Information Security Oversight Office

Reminders

- ✓ Information is classified in one of two ways—originally or derivatively.
- ✓ Only individuals specifically authorized in writing may classify documents originally.
- ✓ Only individuals with the appropriate security clearance, who are required by their work to restate classified source information, may classify derivatively.
- ✓ There are three levels of classification, "TOP SECRET," "SECRET," and "CONFIDENTIAL." Do not use other terms, such as "Official Use Only," or "Administratively Confidential," to identify classified national security information.
- ✓ Information shall not be classified for any reason unrelated to the protection of the national security.
- ✓ Classifiers are responsible for assuring that information is appropriately classified and properly marked.
- ✓ To have access to classified information, a person must have a security clearance at an appropriate level, a signed nondisclosure agreement, and a "need-to-know."
- ✓ Individuals who believe that information in their possession is inappropriately classified, or inappropriately unclassified, are expected to bring their concerns to the attention of responsible officials.

SECTION I

Marking Originally Classified Documents

This is an example of a document that an original classifier has determined requires protection under E. O. 12958. It contains the essential markings required under the Order, including:

- Portion marking*
- Overall classification
- A "Classified by" line to include the identity, by name or personal identifier, and position of the original classifier
- A reason for classification
- A "Declassify on" line which shall indicate one of the following:
 - (1) The date or event for declassification not to exceed 10 years.
 - (2) The date that is 10 years from the date of the original decision.
 - (3) An authorized and applicable exemption category(ies).

This is the same document before the markings were applied.

This section will retrace the steps that are necessary to mark an originally classified document.

Portion Markings

The first step in the marking process is to identify the classification level of each portion. A portion is ordinarily defined as a paragraph. Subjects and titles are also treated as portions. Only in this way can the overall classification level be determined. The three paragraphs of this sample document contain unclassified, "Secret," and "Confidential" information, respectively.

MEMORANDUM FOR THE DIRECTOR

From: David Smith, Chief
Division 5

Subject: Funding Problems

1. This is paragraph 1 and contains unclassified information. Therefore, this portion will be marked with the designation "U" in parentheses.
2. This is paragraph 2 and contains "Secret" information. Therefore, this portion will be marked with the designation "S" in parentheses.
3. This is paragraph 3 and contains "Confidential" information. Therefore, this portion will be marked with the designation "C" in parentheses.

Portion markings consist of the letters "(U)" for unclassified, "(C)" for "Confidential," "(S)" for "Secret," and "(TS)" for "Top Secret." These abbreviations, in parentheses, are placed before or after the portion to which they apply. Persons applying portion markings should confirm appropriate placement of the portion marking for their organization. Portion mark as illustrated in these examples.

Before Each Portion

Subject: (U) Funding Problems

1. (U) This is paragraph 1 and contains unclassified information. Therefore, this portion will be marked with the designation "U" in parentheses.
2. (S) This is paragraph 2 and contains "Secret" information. Therefore, this portion will be marked with the designation "S" in parentheses.
3. (C) This is paragraph 3 and contains "Confidential" information. Therefore, this portion will be marked with the designation "C" in parentheses.

After Each Portion

Subject: Funding Problems (U)

1. This is paragraph 1 and contains unclassified information. Therefore, this portion will be marked with the designation "U" in parentheses. (U)
2. This is paragraph 2 and contains "Secret" information. Therefore, this portion will be marked with the designation "S" in parentheses. (S)
3. This is paragraph 3 and contains "Confidential" information. Therefore, this portion will be marked with the designation "C" in parentheses. (C)

Overall Classification Marking

The second step is to determine the overall classification of the document. The overall classification is the highest classification level of information contained in the document. In this example the highest classification is "Secret," found in paragraph two.

Subject: (U) Funding Problems

1. (U)
2. This is paragraph 2 and contains "Secret" information. Therefore, this portion will be marked with the designation "S" in parentheses.
3. (C)

Conspicuously place the overall classification at the top and bottom of the page, as shown here.

SECRET

SECRET

If the document contains more than one page, place the overall marking at the top and bottom of the outside of the front cover, on the title page, on the first page, and on the outside of the back cover, as shown below.

Mark other internal pages either with the overall classification or with a marking indicating the highest classification level of information contained on that page.

Chapter 1-Funding

1. (U) This is paragraph 1 and contains unclassified information. Therefore, this portion will be marked with the designation "U" in parentheses.

2. (S) This is paragraph 2 and contains "Secret" information. Therefore, this portion will be marked with the designation "S" in parentheses.

"Reason for Classification" Line

The fourth step is to cite the reason(s) for the decision to classify.

Place, at a minimum, a brief reference to the pertinent classification category(ies), or the number 1.5 plus the letter(s) that corresponds to that classification category in section 1.5 of E.O. 12958.

These categories, as they appear in section 1.5 of the Order, include the following:

- (a) Military plans, weapons systems or operations.
- (b) Foreign government information.
- (c) Intelligence activities (including special activities), intelligence sources or methods, or cryptology.
- (d) Foreign relations or foreign activities of the U.S., including confidential sources.
- (e) Scientific, technological, or economic matters relating to the national security.
- (f) U.S. Government programs for safeguarding nuclear materials or facilities.
- (g) Vulnerabilities or capabilities of systems, installations, projects or plans relating to the national security.

Declassify on Line

The last essential marking indicates the duration of classification. Place this on the "Declassify on" line. Choose one of the following three declassification instructions, selecting, whenever possible, the declassification instruction that will result in the shortest duration of classification.

1. Date or Event

When possible, apply a date or event for declassification that corresponds to the lapse of the information's national security sensitivity. The date or event shall not exceed 10 years from the date of the original classification.

OR

2. Ten Year Duration

When a specific date or event cannot be determined, apply the date that is 10 years from the date of the original classification.

3. Exemptions From Ten Year Declassification

If the original classifier determines that the information is exempted from declassification at ten years, apply the letter "X" plus a brief recitation of the exemption category(ies), or the letter "X" plus the number that corresponds to that exemption category(ies) in section 1.6(d) of E.O. 12958.

Section 1.6(d) Exemption Categories

X1. Reveal an intelligence source, method, or activity, or a cryptologic system or activity.

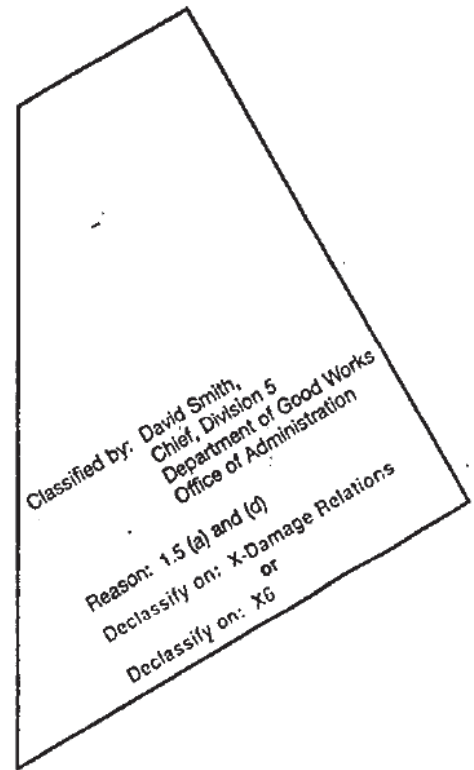

X2. Reveal information that would assist in the development or use of weapons of mass destruction.

X3. Reveal information that would impair the development or use of technology within a United States weapons system.

X4. Reveal United States military plans, or national security emergency preparedness plans.

X5. Reveal foreign government information.

X6. Damage relations between the United States and a foreign government, reveal a confidential source, or seriously undermine diplomatic activities that are reasonably expected to be ongoing for a period greater than [10 years].

X7. Impair the ability of responsible United States Government officials to protect the President, the Vice President, and other individuals for whom protection services, in the interest of national security, are authorized.

X8. Violate a statute, treaty, or international agreement.

Having completed these steps, here again is the document properly marked.

Marking Derivatively Classified Documents

Derivative classification is the act of incorporating, paraphrasing, restating, or generating in new form information that is already classified, and marking the newly developed material consistent with the markings of the source information. The source information ordinarily consists of a classified document or documents, or a classification guide issued by an original classification authority.

Derivatively Classifying From a Source Document

When using a classified source document as the basis for derivative classification, the markings on the source document determine the markings to be applied to the derivative document.

Here is a properly marked source document and a properly marked derivative document. The derivative document contains information taken from paragraph two of the source document. The following will retrace the steps that are necessary to mark a document derived from a classified source.

Please note: The "Reason" line, as reflected in the source document(s) or classification guide, is not required to be transferred to the derivative document. If included, however, carry forward the "Reason" as it appears on the source document.

Derivatively Classifying From Multiple Sources

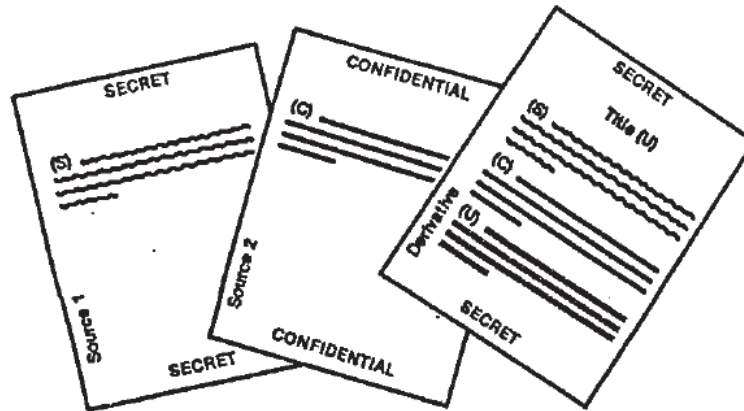

Portion Marking

When using more than one classified source document in creating a derivative document, portion mark the classified information incorporated in the derivative document with the level indicated on the source documents. Portion mark all other portions "(U)." In the example shown, paragraph one of the derivative document incorporates "Secret" information from paragraph one of Source 1 and paragraph two of the derivative document incorporates "Confidential" information from paragraph one of Source 2. The remainder is unclassified.

Overall Classification Marking

Conspicuously mark the derivative document at the top and bottom with the highest classification level of information found in any portion of the document. In the example shown, the overall classification is "Secret." If the derivative document contains more than one page, each page needs to be marked with an overall marking as provided on page 16.

"Derived from" Line

Enter the standard notation "Multiple Sources" on the "Derived from" line of the derivative document to indicate that more than one classified source was used.

Maintain the identification of all classified sources with the file or record copy of the derivative document. If practicable, include the list with all copies of the derivative document.

Source Document Marked "Multiple Sources"

Deriving classified information from a source document that is itself marked "Multiple Sources" presents a special problem in identifying that document on the "Derived from" line of the new document. Do not carry forward the notation "Multiple Sources" to the new document, because the document could not then be used to trace the actual sources of classification. Instead, specifically identify the source document by author, date and subject on the "Derived from" line.
